

Your Guide Through the CBAM Regulation

The Carbon Boarder Adjustment Mechanism is a policy instrument that charges climate-related costs to imported goods.

The industries

Iron and steel

Hydrogen

Aluminum

Cement

Fertilizer

Electricity

The start of CBAM

The Fit for 55 package presented by the European Commission includes reducing the emissions and becoming a climate neutral Europe in 2050. As part of this package, the CBAM regulation has been presented.

When is it happening?

The CBAM regulation started October 1st, 2023. Before the end of January 2024 importers need to upload the first reports. Followed by quarterly reports, which will become annual reporting in 2026.

How can Peterson help?

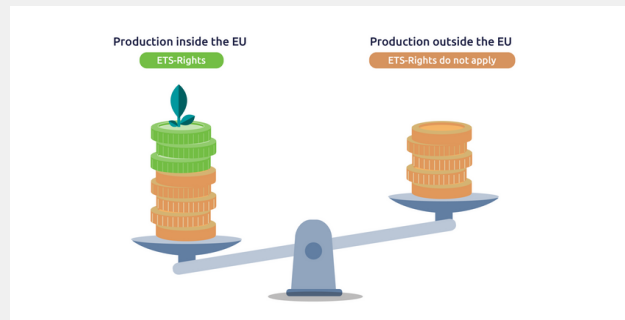

Our specialists in environmental management and CO2 emission reporting collaborate with our custom agent experts, to support you across the supply chain from importers to operators of installations to adhere to CBAM requirements, in the following key services:

- 👉 Guidance on registering your legal entity in the CBAM transitional registry
- ✅ Confirmation of goods affected by CBAM regulation
- 🔄 Active support on the implementation of upstream carbon accounting methodologies according to CBAM requirements
- 📊 Simplification of emissions data and efficient communication to enhance transparency
- 📅 Reporting support, hands-on guidance, and preparation of reporting obligations on a quarterly basis for each EU member state and relevant CBAM reporting entity

Why CBAM?

CBAM has been implemented as an adjustment to the EU ETS system to:

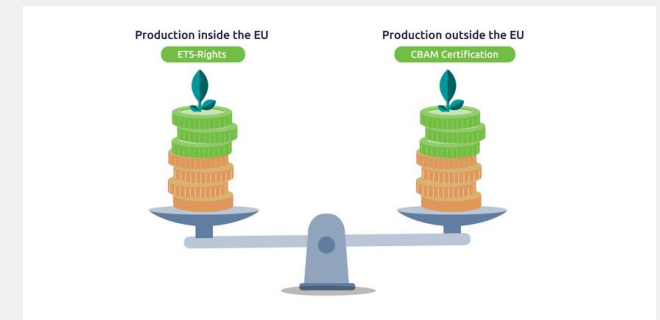

- + Reduce carbon leakage
- + Achieve fair competition
- + Monitor the European economy
- + Stimulate a reduction in emissions worldwide

What obligations do companies have?

Importers of CBAM-goods above €150,- must report the embedded emissions. After the first report importers need to submit quarterly reports. This covers the following industries:

- + Iron and steel
- + Aluminum
- + Fertilizer
- + Hydrogen
- + Cement
- + Electricity
